Applicant's election of the invention I namely claims 1-11 and new claim 29 with traverse has been acknowledged. Since new combination claim 29 is allowable, the restriction requirement for the remaining subcombination claims is still effective because applicant has failed to argue specifically why and how the subcombination claims are not patentably distinct. Independent claims 1,8 and 12 are evidence claims showing they are independent inventions as neither group is relying upon the other group's subject matter for patentability.

Claims 12-28 has been withdrawn from consideration as drawn to an non-elected inventions.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

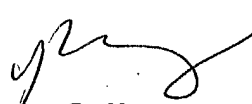

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Grosh et al. Grosh et al shows all the structure of the device as recited by the claims.

Any inquiry concerning this office action will be directed to Examiner Joseph Moy, (703) 308-1145.
